

DEEKSHANA C S

Tiruchengode, Tamil Nadu, India | +91-9087842931 | deekshanacs8@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering (AI & ML) student with hands-on experience building production-grade AI systems across computer vision, deepfake detection, retrieval-augmented generation. Combines applied ML research with full-stack development (Java Spring Boot, React/FastAPI) to ship end-to-end intelligent products.

EDUCATION

K. S. Rangasamy College of Technology — Bachelor of Engineering, Computer Science Engineering (AI & ML)
CGPA: 8.99 / 10.0 | Expected May 2027 | Tiruchengode, Tamil Nadu

TECHNICAL SKILLS

Languages: Python, Java, SQL

AI / ML: Deep Learning, Computer Vision, NLP, Generative AI, Federated Learning, LLM Fine-tuning, Prompt Engineering, RAG

Data Science: Pandas, NumPy, Statistical Analysis, Feature Engineering, Data Visualization, Power BI

Full-Stack Development: React, FastAPI, HTML/CSS, PostgreSQL

AI/ML Platforms & Tools: Hugging Face, TensorFlow Lite, Google Gemini API, Anthropic API, PaddleOCR, FAISS

Dev Tools & Automation: Git, GitHub, VS Code, Streamlit, UiPath (RPA)

EXPERIENCE

AI Research & Development Intern — IITM Pravartak Technologies Foundation *Mar 2026 – Present | Remote*

- Contributed to federated learning research (Horizontal, Vertical, and Transfer FL) and other deep learning architectures within an R&D project team, producing formal presentations and technical documents for the team lead.
- Built and benchmarked Vision Transformer (ViT) models from scratch, converting them to FP32/FP16/PTQ/INT8 TensorFlow Lite formats and analyzing execution performance for on-device deployment.
- Developed a full-stack application for the CHAI initiative as part of the internship's applied engineering track.

Professional Services Consultant — Certainti.AI (Resdev Solutions) *Jul 2025 – Oct 2025 | Remote*

- Performed R&D tax credit and R&D expenditure calculations for client engagements, applying analytical and data-processing skills in a professional-services context.

Machine Learning Intern — Infosys Springboard (Virtual Internship) *Nov 2025 – Jan 2026 | Remote*

- Built Sentinel-AI an Intrusion detection system and a plant disease detection system.

Campus Ambassador — Unstop (formerly Dare2Compete) *2025 – 2026 | KSRCT, Tamil Nadu*

- Served as official Campus Ambassador for AY 2025–26, connecting 400+ students to competitions, scholarships, and career-relevant opportunities.
- Recognized with an official Experience Letter from Ankit Aggarwal, Founder & CEO of Unstop, for meaningful campus impact.

PROJECTS

SheGuard AI — AI Cyber-Forensic Platform for Deepfake & Image Manipulation Detection

- Built a full-stack web platform (React, FastAPI, PostgreSQL) applying computer vision to detect morphed and tampered images in real time; deployed on Hugging Face Spaces, with an in-progress migration to Render.

- Final-year research project: designing a tri-modal (spatial + frequency + temporal) Transformer with cross-modal fusion and explainability for deepfake image/video detection, with a manuscript in preparation for IEEE conference submission.

PaperPilot AI — Research Assistant & Document RAG Chat

- Built a production-ready assistant that parses and indexes academic papers, slide decks, Word documents, and scanned PDFs using PaddleOCR and a local FAISS vector store.
- Delivers real-time RAG chat with page-level citations, plus auto-generated quizzes, flashcards, and interview-prep questions.

Cholan — Multilingual AI Agriculture Assistant

- Built a Telegram-based conversational AI assistant delivering ML-powered, agriculture-specific responses to crop and weather queries through a simple guided chat flow, extending AI-driven support to users with limited technical literacy in rural communities.

Velox Vision — AI Traffic Monitoring & Speed Enforcement Platform (Ongoing)

- Developing a production-grade traffic monitoring platform (Clean Architecture) combining YOLOv8 vehicle detection, multi-object tracking, EasyOCR license-plate recognition, automated overspeed detection, evidence capture, CSV logging, and a Streamlit dashboard; open-sourced under an MIT license.

Additional Team Projects: Team Management System, RiverAI, and Nexus Pulse — full-stack RBAC, IoT/deep-learning river-flood monitoring, and healthcare ML anomaly-detection projects.

CERTIFICATIONS

Microsoft Certified: SQL AI Developer Associate • Oracle Fusion AI Agent Studio Foundations Associate • Oracle DevOps Professional • Oracle AI Foundations • Google Cloud Generative AI • Certified Purple Fabric AI Champion

- Deloitte Data Analytics

ACHIEVEMENTS & LEADERSHIP

- Global Shortlist, NASA Space Apps Challenge 2024; Published Author & Compiler, Hope's Tapestry
- Hosted and managed 50+ technical and cultural events at KSRCT
- AEVA (AI ML Empowered Visionary Alliance) — Secretary (2025–26), leading AI/ML workshops; previously Joint Treasurer (2024–25), managing finances
- Podcast Creator, The Echo Cup — hosts and produces original podcast episodes on AI, technology, and student life
- Selected participant, "A Day at Microsoft" programme in Chennai and Bengaluru
